## RETRACTABLE RAILINGS

**The best protection against bad weather conditions and wind!**

**WWW.GLASSFASADE.NO**

Ægirs vei 2, 4632  
Kristiansand, Norway

**Wind-Dam Systems** is an innovative, retractable glass railing. Designed for spaces exposed to the elements of wind, sand and noise

With a single movement the glass height is easily increased or lowered to suit the weather conditions or your preference.

The world's first structural balcony balustrades with a retractable wind protection system.

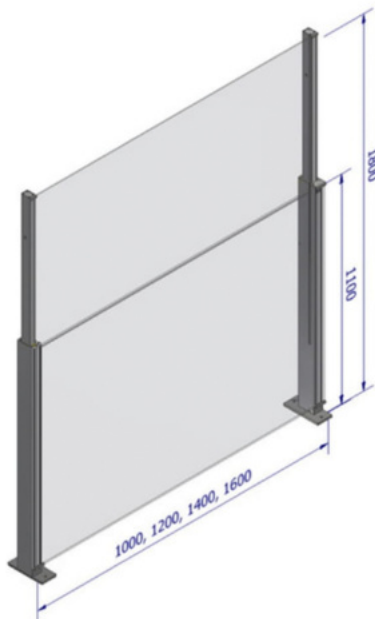

Wind-Dam railings fulfil a practical protective function, they increase the comfort of the area and the user. They can be used on balconies and gardens, restaurants, terraces and swimming pools.

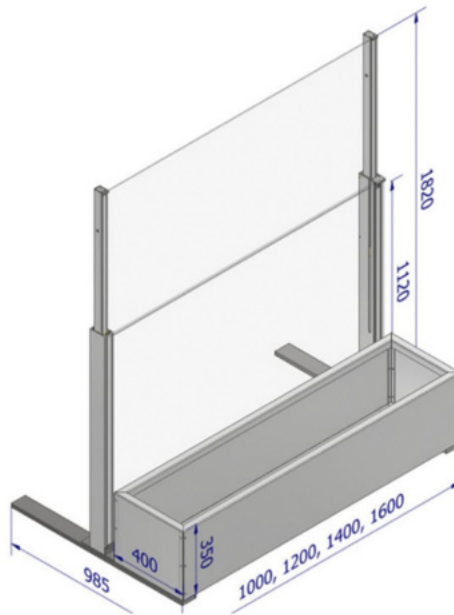

### WIND-DAM
